

Loop 202 High Occupancy Vehicle Lanes (HOV)

Gilbert Road to I-10 (Red Mountain and Santan Freeways)

ADOT Project Number: 202 MA 16 H7457 01L Federal Aid ID No.: NH-202-B(BCC)

PROJECT SUMMARY

As part of the Maricopa Association of Governments (MAG) Regional Transportation Plan, High Occupancy Vehicle lanes will be added to the Loop 202 (Red Mountain and Santan Freeways) from Gilbert Road in Mesa to I-10 in Chandler. The project also will include the construction of directional ramps connecting the Loop 202 HOV lanes to U.S. 60, Loop 101, and I-10 HOV lanes.

The HOV lanes are intended to improve traffic flow, encourage carpooling, and expand the regional transit network. During restricted hours, HOV lanes are designated for vehicles carrying two or more occupants, certified alternative-fuel vehicles, motorcycles, Valley Metro buses, and emergency vehicles. Restricted hours are 6 a.m. - 9 a.m. and 3 p.m. to 7 p.m. Monday through Friday. All vehicles may use the HOV lanes during unrestricted hours.

Before designing the improvements, the Arizona Department of Transportation will complete a Design Concept Report (DCR) and an environmental document for this 39-mile project. These documents evaluate alternatives to accommodate the new HOV lanes. It is anticipated that the project will be constructed within the existing roadway right-of-way. Implementation of these HOV lanes will be done through five separate design and construction projects between 2013 and 2025.

PROJECT SCHEDULE

- D** Design Year
- C** Construction Year
- Directional Ramps
